

**Propedtherapy 3 semester The thematic plan of lectures and practical classes
Unit №1**

	Theme of lecture	Hours	Theme practically lesson	Hours
1	Introduce in clinic. Propaedeutic as subject. Methods and scheme physical examination of patient. Inquiry. Meaning of anamnesis. анамнеза.	2	Introduce in clinic. Mains tasks of subject. Conception about methods examination of patient. Scheme of physical examination of patient. Inquiry. Scheme and methods of examination. Total information. Complaints. Anamnesis.	2
2	Inspection. Rules and scheme of inspection. Medicine anthropometry. Palpation of skin, subcutaneous fat of cellulous, lymph nodes, Inspection separate parts of body: inspection of head, face, eyelids, pupils, neck.	2	General examination. Variants of consciousness. Build, its meaning. Anthropometry. Temperature of bodes. Inspection of skin, its derivatives. Inspection and valuation of lymph nodes. Inspection. Palpation. Meaning condition of lymph nodes.	2
3			Inspection separates parts of body: inspection of head, face, eyelids, pupils, neck. Inspection and palpation of thyroid gland. Valuation theirs. Inspection of extremities.	2
3	Percussion, its physical bases, methods and forms, main rules. Auscultation, its physical bases, methods and forms, basics rules of examination.	2		
4	Inspection, palpation, Percussion of chest and auscultation of lungs. Functional methods of examination.	2	Inspection of respiratory system. Inspection, palpation of chest.	2
6			Percussion of chest. Methods and rules of percussion. Comparative percussion of lung. Topographic percussion.	2
			Auscultation of lungs. Methods and rules of auscultation. Breath sounds. Inspection of bronchophony.	2
			Unit №1	2
	Total:	8		14

The thematic plan of lectures and practical classes Unit №2

	Theme of lecture	hours	Theme of practical lesson	hours
1	Examination of cardiovascular system. Inspection, palpation of vessels. Measurement of arterial pressure. Rules and methods. Inspection, palpation of heart area. Apex beat.	2	Examination of cardiovascular system. Inspection, palpation of vessels. Measurement of arterial pressure. Rules and methods.	2
2	Percussion of heart, rules and technique. Auscultation of heart. Methods and rules auscultation of heart. Heart sounds: S1, S2, S3, S4. Characteristics of heart sounds in healthy persons.	2	Inspection, palpation of heart area. Apex beat. Percussion of heart, rules and technique. Absolute and relative border of heart.	2
			Auscultation of heart. Methods and rules of heart auscultation. Heart sounds. Characteristic of heart sounds in healthy persons.	2
3	Electrocardiography, phonocardiography, echocardiography.	2	Electrocardiography, phonocardiography, Echocardiography.	2
			Unit №2	2
	Total	6		10

The thematic plan of lectures and practical classes Unit №3

№	Theme of lecture	Hours	Theme of practical lesson	Hours
1	Examination of gastrointestinal tract. Physical and functional methods of examination.	2	Inspection of mouth. Inspection of abdomen. Palpation of organs of abdominal cavity. Methodic of surface tentative palpation. Deep methodical sliding palpation. Value.	2
2			Clinical-laboratory examination of gastrointestinal tract.	2

3	Examination of Liver. Physical and functional methods of examination.	2	Physical examination of liver, pancreas. Auscultation of abdomen. Percussion of abdomen.	2
4			Clinical-laboratory examination of liver and bile ducts.	2
5			Examination of blood and hemopoietic organs (spleen).	2
6	Methods examination of kidneys and urinary tracts. Physical and functional methods examination.	2	Examination of kidneys and urinary tracts.	2
7			Project of History taking on example of the healthy person.	2
8			Unit №3	2
	Total	6		16
