

**The thematic plan of lectures and practical lessons Endocrine system disorders.  
Propedtherapy department to study on 4 semester.**

	Theme of lecture	Number hours	Theme practically lesson	Number hours
1	<p>Syndrome of hyperfunction of thyroid gland. Clinical displays, laboratory and instrumental criteria. Value of functional and morphological methods of inspection in syndrome diagnostics.</p> <p>Syndrome of hypofunction of thyroid gland. Clinical displays, laboratory and instrumental criteria. Value of functional and morphological methods of inspection in syndrome diagnostics.</p>	3	<p>Syndrome of hyperfunction of thyroid gland. Clinical displays, laboratory and instrumental criteria. Value of functional and morphological methods of inspection in syndrome diagnostics.</p>	3
			<p>Syndrome of hypofunction of thyroid gland. Clinical displays, laboratory and instrumental criteria. Value of functional and morphological methods of inspection in syndrome diagnostics.</p>	2
2	<p>Syndrome of infringement of tolerance to glucose: - syndrome hypoglycemia: clinical displays, laboratory and instrumental criteria. - syndrome hyperglycemia: clinic displays, laboratory and instrumental criteria.</p> <p>Syndrome chronic adrenal insufficiency. Clinical displays, laboratory and instrumental criteria. Value of functional and morphological methods of inspection in syndrome diagnostics.</p> <p>Syndrome of infringement of fatty exchange. Clinical symptoms, methods of verification of syndrome, definition of its type. Value of instrumental (functional) methods of inspection in syndrome diagnostics. Biochemical indicators of condition of fatty and carbohydrate exchanges.</p>	3	<p>Syndrome of infringement of tolerance to glucose: - syndrome hypoglycemia: clinical displays, laboratory and instrumental criteria; - syndrome hyperglycemia: clinic displays, laboratory and instrumental criteria.</p>	3
